WISCONSIN HIGH SCHOOL GRADUATES AND THEIR ATTENDANCE AT WISCONSIN COLLEGES, FALL 1962

Overview

. . . The number of high school graduates in Wisconsin in 1962 represented a decrease of approximately three per cent from the total 1961 graduates. Forty-five counties experienced a decrease. These decreases were due to lower birth rates in 1944 and 1945. By 1946 and ensuing years the birth rates again increased, so that increases in the number of high school graduates can be expected to occur in 1964 and 1965.

. . . From 1957 to 1962, the percentage increase of high school graduates was more rapid than the percentage increase of the estimated college-age population (18-21) -- approximately 24 per cent and 15 per cent respectively.

. . . Counties which graduated more than 1,000 high school students are located in the southeastern part of the state with the exception of Marathon County. Milwaukee County graduated more than 10,000 students both in 1961 and 1962.

. . . Wisconsin's publicly-supported colleges continue to enroll a mounting number of the state's resident new freshmen - more than four-fifths of the total in 1961 and 1962.

. . . The state colleges have experienced a consistent rise in numbers and percentages of new freshmen since 1956, and by 1962 surpassed the total number enrolled at the University of Wisconsin campuses for the first time. The percentage of total new freshmen in the state who enrolled at the University of Wisconsin-Madison decreased approximately 2 per cent in 1962 from 1956, while the extension centers increased about 1 per cent over the same period. Little change was noted from 1956 to 1962 in new freshmen enrollment at the University of Wisconsin-Milwaukee. County college and private college new freshmen enrollment decreased from 1956.

. . . Although the total number of high school graduates in the state decreased in 1962 from 1961, the state's total percentage of graduates who enrolled

in Wisconsin's colleges as new freshmen continued to show an increase in 1962. Thirty-one per cent were enrolled in the state's colleges in 1959, 31.8 per cent in 1960, 33.8 per cent in 1961, and 34.8 per cent in 1962. (Does not include enrollment in out-of-state colleges.)

. . . The continued rate of increase in college-going by many of the counties is promising. Seven counties sent more than 40 per cent of their high school graduates to colleges in the state in 1962. Forty-one counties sent over 30 per cent in 1962 compared to 24 counties in 1959.

. . . The southeastern, south central, northern, and Fox Valley-Door County areas provided the highest rate of college-going in the state. Improvements can be noted in 1962 in several of the southwestern and central counties over previous years, however.

. . . Although the state's public colleges enrolled more students than the private colleges, a larger number of students from the southeastern, south central, and Fox River Valley-Door County areas attended private colleges in Wisconsin than did students from the other areas in the state.

WISCONSIN HIGH SCHOOL GRADUATES AND THEIR ATTENDANCE AT WISCONSIN COLLEGES, FALL 1962

Wisconsin High School Graduates

In the spring of 1962 there were 49,062 students graduated from Wisconsin's public and private high schools. Private high schools accounted for 7,524 graduates, or 15 per cent of the total. The 1962 total of high school graduates represents a decrease of 2.7 per cent from the 1961 graduates. Forty-five counties in the state graduated fewer students in 1962 than in the previous year. The decrease in the number of births in 1944 and 1945 from the immediately preceding years seems to account for the decrease in high school graduates at this time. Table I presents the Wisconsin births from 1940 through 1947:

Table I

Wisconsin Births*

1940	56,324
1941	58,043
1942	64,504
1943	65,404
1944	61,928
1945	61,577
1946	74,868
1947	84,562

* Wisconsin Blue Book, 1962, p. 688.

Undoubtedly, there will be another decrease in high school graduates in 1963 due to a lower birth rate in 1945. By 1946, however, the number of births increased approximately 22 per cent over 1945, and another large birth rate occurred in 1946. It is probable that we can expect a substantial increase in the number of high school graduates by 1964 and 1965, and even more in the years following.

During the five years preceding 1962, the annual percentage increase of high school graduates was more rapid than the percentage increase of the college-age population (18-21). From 1957 to 1962, the percentage increase of high school graduates was approximately 24 per cent, while the percentage increase of the estimated college-age population over the same period was nearly 15 per cent. Table II shows both the annual rate of increase of the number of high school graduates from 1957 through 1962 and that of the estimated college-age population over the same years.

Table II

	No. of high school grads	% increase or decrease	Est. college age pop. (18-21)*	% Rate of increase
1957	39,712		176,792	
1958	40,362	1.6%	178,639	1.0%

*Source: Ronald B. Thompson, Enrollment Projections for Higher Education 1961-1978. American Assn. of Collegiate Registrars and Admissions Officers, September, 1961. p.31

Table III presents the total number of high school graduates for each county from 1957 through 1962, and the per cent change from 1957-62 and from 1961-62. From 1957 to 1962, high school graduates increased in all but six of the counties and twenty-three counties exceeded the state average of a 23.5 per cent increase. Increases in twenty-nine counties reached or exceeded 20 per cent, nineteen others gained from 10-20 per cent, and fourteen increased from 1 to 10 per cent.

From 1961 to 1962, on the other hand, forty-five counties experienced a decrease, eleven of which lost more than 10 per cent. Only four counties in the state gained more than ten per cent in high school graduates in 1962, -- Dodge, Florence, Lafayette, and Ozaukee counties.

As to be expected, Milwaukee County has always provided the largest number of high school graduates. Although the county experienced a small decrease in 1962 the number of graduates in 1961 and 1962 climbed well past the 10,000 figure.

With the exception of Marathon County in the central part of the state and Dane County in the south central area, the counties which graduated more than 1,000 students in 1962 are located in the southeastern and Fox River Valley part of the state. At the lower end of the scale are 17 counties numbering 250 graduates or less, half of which are in the northern part of the state. Table IV places the counties in categories ranging from more than 1,000 high school graduates to less than 250 in 1962.

Table IV

1962 High School Graduates

Counties graduating more than 1,000 students:

Milwaukee	10,397	Racine	1,552	Sheboygan	1,123
Dane	2,438	Outagamie	1,335	Marathon	1,114

Richland	194	Forest	110		

Wisconsin New Freshmen

In the fall of 1962, Wisconsin's publicly-supported colleges maintained their proportion of four-fifths of the Wisconsin resident new freshmen enrollment which they held in 1961. Table V below shows the increasing share of new freshmen the state's public colleges have enrolled since 1953, with a gain of 9 percent by 1962.

Table V

Percentage of Wisconsin Resident Full-Time New Freshmen Enrollment in Wisconsin's Public and Private Colleges

Year	Publicly-controlled	Privately-controlled
1956	72.2%	27.8%
1959	78.1	21.8
1960	78.6	21.4
1961	81.0	19.0
1962	81.4	18.6

Table VI gives the institutional preferences of the new freshmen enrolled during 1956, 1959, 1960, 1961, and 1962.

Among the types of institutions in the state, the state colleges have experienced a consistent rise in numbers and percentages of new freshmen since 1956, and by 1962 surpassed those enrolled at the total University of Wisconsin campuses for the first time. The percentage of new freshmen in the state who enrolled in the University of Wisconsin-Madison in 1962 decreased approximately 2 per cent from 1956, while the extension centers increased about 1 per cent over the same period. There was little change in the percentage of new freshmen who attended the University of Wisconsin-Milwaukee from 1956 to 1962. The total University new freshmen enrollment, all campuses, was down slightly from 1956.

County college new freshmen enrollment decreased from 1956, and the private colleges experienced a 9 per cent loss since 1956. Milwaukee Institute of Technology had a 6 per cent increase, although their new freshmen included full-time vocational students.

GRAND TOTAL	14,746		16,713		19,630		21,446		21,862	

Although the total number of high school graduates in the state decreased in 1962 from 1961, the percentage of graduates who entered Wisconsin's institutions as new freshmen continued to show an increase in 1962. Thirty-one per cent of the high school graduates in the state were enrolled as new freshmen in Wisconsin's colleges in 1959, 31.8 per cent in 1960, 33.8 per cent in 1961, and 34.8 per cent in 1962. This percentage does not include those

high school graduates who enrolled in out-of-state colleges or in types of post-high school education other than the two- and four-year public and private colleges in the state.

The rate of college-going by a sizable number of individual counties again showed an encouraging increase in 1962. Seven counties sent more than 40 percent of their high school graduates to colleges, and nineteen counties had over 35 per cent of their graduates enrolled as new freshmen. Forty-one counties sent over 30 per cent to college as new freshmen in 1962, 40 in 1961, while only 27 counties in 1960 and 24 in 1959 sent more than 30 per cent.

Maps A, B, and C divide the state into the same geographical areas used in the earlier studies prepared in 1962 and 1961. (CCHE #1, 1962 and Supplement) Map A gives the number of Wisconsin high school graduates from each area for 1959, 1960, 1961, and 1962. Map B has similar figures for new freshmen from each area, and Map C shows the percentages of high school graduates in these areas who were enrolled in the state's colleges over the same years.

It can be seen readily that in 1962 high school graduates decreased in all of the areas with the exception of a very small increase in the West Central portion. The greatest decrease was experienced by the Fox River Valley-Door County group.

In actual numbers, new freshmen from these areas also showed some decreases except for the southern groups in the state. Percentagewise, however, the proportion of high school graduates who continued to college from most of these areas showed an increase, and in the northwestern and west central groups where a decrease was experienced, this decrease was small. By 1962 more than

40 per cent of the entire southeastern area had enrolled new freshmen in the state's colleges. This area, along with the south central, northern, and Fox River Valley-Door County areas, has sent a higher percentage of new freshmen to college than the rest of the state since 1959.

MAP C
Percentage of High School Graduates Enrolled
As New Freshmen
in Wisconsin's Colleges
1959 1960 1961 1962

Statistics of the state's high school graduates and new freshmen from individual counties within each geographical area are compared from 1959 through 1962 in the following tables.

The heavily-urban southeastern counties (Table VII) have always provided the largest numbers of high school graduates and new freshmen in the state. By 1962 Kenosha, Milwaukee, and Ozaukee counties enrolled over 40 per cent of their high school graduates as new freshmen, with Ozaukee reaching the highest percentage in the state, 48.5 percent. All of these counties have high percentages except Washington County, which again dropped below 30 per cent in 1962. Only during 1961 did this county's percentage pass 30 per cent, but approximately 28 per cent seems to be the more consistent percentage for the county.

Table VII

Southeastern Counties
High School Graduates and New College Freshmen

County	Number of high school graduates in county				Number of new freshmen from county				% of high school grads from county who are new fresh. in Wis. institutions			
	1959	1960	1961	1962	1959	1960	1961	1962	1959	1960	1961	1962
Kenosha	863	1032	1042	1054	316	375	408	425	36.6	36.3	39.2	40.3
Milwaukee	8551	9585	10672	10397	3254	3801	4305	4439	38.0	39.7	40.3	42.7
Ozaukee	262	339	333	392	96	108	112	190	36.6	31.9	33.6	48.5
Racine	1357	1492	1565	1552	428	518	567	540	31.5	34.7	36.2	34.8
Walworth	316	621	682	699	209	227	256	250	33.0	36.5	37.5	35.8
Washington	469	621	589	601	124	166	183	161	26.4	26.7	31.1	26.8
Waukesha	1536	1906	2039	2006	468	612	735	766	30.4	32.1	36.0	38.2

There are tables in the Appendix which show the Wisconsin colleges attended by new freshmen from each county in the state for the years 1956,

1959, 1960, 1961, and 1962, along with total figur s for the five years. The southeastern counties, -- Kenosha, Ozaukee, Milwaukee, Racine, Walworth, Washington, and Waukesha -- are given in Table 1.

Greater numbers of new freshmen from Racine and Kenosha counties attended the extension centers in their home counties than other colleges in the state. More students from Ozaukee County enrolled in the University of Wisconsin, both at Madison and Milwaukee.

Large numbers of new freshmen from Milwaukee County habitually attended the many colleges in that county. In 1956, 1959, 1960, 1961, and 1962 there was a total of more than 18,000 new freshmen from Milwaukee County. Of this total over 14,000 were enrolled in Milwaukee County's public and private colleges. More than 9,000 attended the University of Wisconsin-Milwaukee and the Milwaukee Institute of Technology; the remainder, the many private colleges with the largest enrollment among these at Marquette University. The University at Madison also enrolled a considerable number of students from Milwaukee County.

New freshmen from Walworth County chose to enroll mainly at Whitewater in the home county and at the University of Wisconsin-Madison. Most of the students from Washington County went to the public colleges with the majority at the University of Wisconsin-Madison and Milwaukee, Oshkosh, and Whitewater. Those from Waukesha County enrolled in larger numbers at the University of Wisconsin-Madison and Milwaukee, and also at Whitewater. It is also evident that substantial numbers of students from the southeastern area enrolled in Wisconsin's private colleges.

In the group of south central counties (Table VIII), high school graduates were down in all but Dane and Dodge counties. With the exception of Columbia and Rock counties, however, the proportion of new freshmen enrolled at the state's colleges continued to be favorable in this area. Both Columbia and Rock counties have maintained a percentage below the state average each year, yet both are increasing their percentages slowly. As has been noted in previous studies (CCHE #1, 1962 and supplement) Rock County is one of the high income counties in the state, is located on the Illinois border, and is one which sends a substantial number of students to private colleges in the state. It is possible, therefore, that many of the high school graduates from Rock County may have enrolled in colleges out of the state, and if this figure were known, the county's college-going rate could be higher.

Table VIII

South Central Counties
High School Graduates and New College Freshmen

County	Number of high school graduates in county				Number of new freshmen from county				% of high school grads from county who are new fresh. in Wis. institutions			
	1959	1960	1961	1962	1959	1960	1961	1962	1959	1960	1961	1962
Columbia	631	669	719	707	112	167	174	188	17.8	24.9	24.2	26.6
Dane	2001	2274	2421	2438	722	878	986	983	36.0	38.6	40.7	40.4
Dodge	545	584	558	632	202	164	176	207	37.0	28.1	31.5	32.8
Green	291	310	317	310	106	96	115	102	36.4	31.0	36.3	32.9
Jefferson	578	707	752	714	158	214	228	249	27.3	30.3	30.3	34.9
Rock	1153	1281	1343	1327	313	356	392	391	27.1	27.8	29.2	29.5

Table 2 in the Appendix reveals that more high school graduates from the south central counties enrolled at the University of Wisconsin-Madison than in

any other college in the state. Two-thirds of the new freshmen from Dane County attended Madison over the years 1956, 1959-1962. Approximately an equal number from Rock and Jefferson counties enrolled at the University in Madison and at Whitewater. More private colleges were attended by students from Dane, Rock, and Jefferson counties than from other counties in this area.

Only Crawford, Lafayette, and Sauk counties showed some increase in high school graduates in the southwestern group (Table IX). This group, which consistently recorded the lowest rate of college attendance in the state in the years previous to 1962, made some improvement in its percentages by 1962. Richland County continued to produce one of the highest percentages in the state in 1962 which it enjoyed in 1961. The new freshmen percentage from Grant County reached nearly 32 per cent after being below 30 per cent for the two previous years. Iowa County, which had one of the lowest percentages in earlier years, recorded a 10 per cent increase to 32 per cent in 1962.

The rest of the counties, however, did not attain 30 per cent. Sauk County experienced some increase, though it still was under 30 per cent. Crawford County also improved, but its rate of college-going remained one of the lowest in the state. Vernon County suffered a 14 per cent drop from 1961 and sent the lowest percentage in the state to Wisconsin's colleges in 1962. The actual number of new freshmen from Vernon County also dropped appreciably from each of the previous years.

Table LX

Southwestern Counties
High School Graduates and New College Freshmen

County	Number of high school graduates in county				Number of new freshmen from county				% of high school grads from county who are new fresh. in Wis. institutions			
	1959	1960	1961	1962	1959	1960	1961	1962	1959	1960	1961	1962
Crawford	335	342	303	317	63	67	66	76	18.8	19.6	21.8	24.0
Grant	621	710	660	652	196	193	191	208	31.6	27.2	28.9	31.9
Iowa	252	241	261	250	53	56	59	80	21.0	23.2	22.6	32.0
Lafayette	237	244	240	282	64	66	49	72	24.0	27.0	20.4	25.5
Richland	275	258	211	194	66	76	84	73	24.0	29.4	39.8	37.6
Vernon	374	357	421	372	90	88	124	56	24.1	24.6	29.5	15.1
Sauk	441	532	550	558	140	174	137	156	31.8	32.7	24.9	28.0

Table 3 in the Appendix gives the college preference of the high school graduates from the southwestern group of counties. Few students from this group of counties were enrolled in any substantial numbers at the state's private colleges. Only Crawford County high school graduates showed a preference for a private university - Marquette - and approximately the same number also attended the public college of La Crosse. Platteville drew a considerable number from this group of counties. Over the total span of years nearly 70 per cent of the new freshmen from Grant County attended Platteville where it is located, and 57 per cent from Iowa County and over 50 per cent from Lafayette County also enrolled at Platteville. Approximately an equal number of students from Richland County attended Platteville, the University of Wisconsin-Madison, and Richland County Teachers College. Sauk County high school graduates enrolled mainly at the University in Madison and its county teachers college, and the majority of the rest of its students preferred several of the state colleges. About a third of the students from Vernon County attended La Crosse, although in 1962 Vernon County enrollment at La Crosse was considerably reduced.

The Fox River Valley-Door County area, along with the southeastern and south central groups, produced the largest numbers of high school graduates and new freshmen in the state. High school graduates were down in this area in 1962 as they were in most of the state, but the proportion who continued to go on to college remained high (Table X). Door, Brown, Outagamie, Manitowoc, Winnebago, and Fond du Lac counties produced favorable percentages. Kewaunee County, which had one of the lowest records in the state in previous years showed evidence of improvement by 1962. Some fluctuation seems to be experienced by Sheboygan County, with a high percentage one year and a lower one the succeeding year.

Table X

Fox River Valley and Door County Area
High School Graduates and New College Freshmen

County	Number of high school graduates in county				Number of new freshmen from county				% of high school grads from county who are new fresh. in Wis. institutions			
	1959	1960	1961	1962	1959	1960	1961	1962	1959	1960	1961	1962
Door	264	295	320	311	86	81	113	112	32.6	27.5	35.3	36.0
Kewaunee	326	314	315	342	68	60	78	100	20.9	19.1	24.8	29.2
Brown	1499	1627	1741	1702	469	497	567	561	31.3	30.5	32.6	33.0
Outagamie	1166	1307	1423	1385	339	368	401	402	29.1	28.2	28.2	30.1
Manitowoc	905	1058	1071	1071	287	337	307	388	31.7	31.9	28.7	36.2
Winnebago	1062	1193	1316	1241	371	390	495	509	34.9	32.7	37.6	41.0
Calumet	290	255	287	292	73	69	83	79	25.2	27.1	28.9	27.1
Fond du Lac	893	1063	1111	1028	227	299	401	340	25.4	28.1	36.1	33.2
Sheboygan	1021	1152	1180	1123	347	324	419	330	33.9	28.1	35.5	29.4

High school graduates from this area who went on to college seemed to prefer several of the extension centers in the vicinity (see Table 4, Appendix).

More students from Brown, Manitowoc, and Sheboygan counties enrolled in their home extension centers than in any other college in the state. Outagamie County high school graduates also favored an extension center, Fox Valley in Winnebago County. Those from Winnebago County attended Oshkosh State College largely, however, although a substantial number attended Fox Valley Extension as well. Oshkosh State College also was attended by more students from Fond du Lac and Calumet counties than other colleges. Kewaunee County sent approximately the same number to Green Bay Extension and Door-Kewaunee County Teachers College. A considerable number of students from this area attended the University of Wisconsin at Madison. It is evident, too, that this group of counties enrolled many of its students in the private colleges in the state.

Most of the central group of counties (Table XI) experienced a decrease in the number of high school graduates or little change from 1961. In general, however, the proportion of those who went on to college from this area showed improvement over previous years.

The percentage of new freshmen from Adams and Portage counties continued to remain high, and a considerable increase -- nearly 13 per cent over 1961 -- can be noted in Marquette County, which formerly produced low percentages of college-going students. Green Lake attained one of the higher percentages in the state in 1962, and Waushara County maintained its 31 per cent held in 1961. Marathon County had a college-going rate of nearly 33 per cent, experiencing a steady rise since 1959. Juneau, Shawano, Waupaca, and Wood counties were under 30 per cent each of the four years.

Table XI

*Central Counties
High School Graduates and New College Freshmen

County	Number of high school graduates in county				Number of new freshmen from county				% of high school grads from county who are new fresh. in Wis. institutions			
	1959	1960	1961	1962	1959	1960	1961	1962	1959	1960	1961	1962

Wood	822	829	867	864	196	189	221	224	23.8	22.8	25.5	25.9
Marquette	101	104	116	126	18	30	23	41	17.9	28.8	19.8	32.5
Green Lake	226	228	233	214	64	72	71	73	28.3	31.6	30.5	34.1

*The new Menominee County is in this group, but since it contains no high schools and enrolled only one new freshman at UW-Madison, it is not included in the table.

**Marathon numbers of high school graduates and percentages of new freshmen will differ from earlier studies due to an error in location of a high school.

Table 5 in the Appendix gives the colleges preferred by the high school graduates from the central group of counties. Over the five-year period, Stevens Point was chosen by approximately three-quarters of the graduates from Portage County, and by a higher percentage from Adams, Marquette, Shawano, Waushara, and Wood counties than any other college in the state. A considerable portion of students from the rest of the counties also attended Stevens Point. Marathon Extension enrolled 41 percent of Marathon County's high school graduates over the same period of years. New freshmen from Juneau County were enrolled in equal numbers at La Crosse and Juneau County Teachers College. Other

colleges chosen by many of the students from this area included the University of Wisconsin-Madison and several of the state colleges. By and large, students from the central counties elected to enroll in the public colleges in the state.

High school graduates made some increases in four out of nine counties in the west central area (Table XII), with La Crosse graduating the largest number. The remaining five counties suffered decreases.

Eau Claire County has consistently produced the highest percentage of high school graduates in the group who enrolled in Wisconsin's colleges. La Crosse County has maintained a good percentage for the last two years. Encouraging progress can be noted in Jackson County, which had one of the lowest rates of college-going in the state in 1959 and 1960. Clark and Chippewa counties sent under 30 per cent to the state's colleges each of the four years, and Trempealeau and Monroe counties continued to enroll some of the lowest percentages recorded in the state over the four-year period. Pepin County experienced a loss from 1960 and 1961.

Table XII

West Central Counties
High School Graduates and New College Freshmen

County	Number of high school graduates in county				Number of new freshmen from county				% of high school grads from county who are new fresh. in Wis. institutions			
	1959	1960	1961	1962	1959	1960	1961	1962	1959	1960	1961	1962
Chippewa	551	592	624	657	116	164	182	173	21.1	27.7	29.2	26.3

Buffalo	156	172	190	196	39	56	53	59	25.0	32.6	27.9	30.1
Trempealeau	378	404	423	404	77	83	87	94	20.4	20.5	20.6	23.2
Jackson	215	195	249	198	42	45	70	61	19.5	23.0	28.1	30.8
La Crosse	970	1042	930	993	285	301	332	336	29.4	28.9	35.7	33.8
Monroe	450	513	432	423	101	110	104	90	22.4	21.4	24.1	21.3
*Clark	461	505	522	517	121	121	148	151	26.2	24.0	28.4	29.2

*A correction was made in Clark County in number of high school graduates in 1959 and 1960 due to an error in location of a high school. Therefore, these figures and percentages will differ from earlier studies.

In the west central group of counties, the high school graduates enrolled in Eau Claire and La Crosse State College in larger numbers than in any other college in the state (see Table 6 in the Appendix). Over 80 per cent of the new freshmen from the home county attended Eau Claire over the five-year period, and nearly three-quarters of those in La Crosse County chose La Crosse State College. New freshmen from Buffalo, Chippewa, Clark, Jackson, Pepin, and Trempealeau also entered Eau Claire in larger numbers than any other college in the state. It appears that students from this part of the state elected to enroll mainly in Wisconsin's public colleges.

The northwestern group of counties (Table XIII) did not perform as well as they did in 1961 with respect to the percentage of high school graduates who went on to Wisconsin's colleges. Only St. Croix and Pierce counties in the group maintained percentages well above 30 per cent and increased them over the previous years. Although high school graduates increased in Dunn County in 1962, new freshmen decreased, and for the first time over the four-year period, Dunn County's percentage dropped below 30 percent. The previous three years it had one of the highest percentages in the state. Barron County also suffered a loss in new freshmen in 1962, while Polk remained about the same.

Table XIII

Northwestern Counties
High School Graduates and New College Freshmen

County	Number of high school graduates in county				Number of new freshmen from county				% of high school grads from county who are new fresh. in Wis. institutions			
	1959	1960	1961	1962	1959	1960	1961	1962	1959	1960	1961	1962
Polk	394	441	475	441	103	116	129	120	26.1	26.3	27.2	27.2
Barron	494	507	600	599	136	139	194	152	27.5	27.4	32.3	25.4
St. Croix	356	368	355	368	83	93	114	121	23.3	25.3	32.1	32.9
Dunn	270	319	332	347	119	126	124	102	44.1	39.5	37.3	29.4
Pierce	318	319	373	359	93	90	119	118	29.2	28.2	31.9	32.9

Except for Dunn County, many of the high school graduates from the northwestern group chose to enroll in River Falls State College in Pierce County (Table 7, Appendix). Those from the home county almost entirely selected River Falls -- 80 per cent. Barron County, Polk and St. Croix counties also enrolled many of their graduates at River Falls. Stout, in Dunn County, enrolled 45 per cent of the new freshmen from that county over the five-year period. A

considerable number of students from the northwestern group also selected Eau Claire. The public colleges were favored by the students in this group.

The number of high school graduates in the northern area (Table XIV) were lower in 1962 than in 1961 in most of the counties. In some cases, there were fewer graduates in 1962 than there were in 1959 and 1960 as well. A substantial decrease is recorded by Douglas County.

The proportion of those who enrolled as new freshmen from this area, however, continued to be high from a majority of the counties. This fact has been true over the five-year period in general, in spite of being an area where nearby opportunity for higher education is lacking for so many of its students. In 1962, some counties experienced substantial increases in the percentage of their graduates who went on to college, -- Douglas, Ashland, Florence, and Rusk. On the other hand, in 1962 a few lost the high percentages they had held in previous years, such as Sawyer, Taylor, and Langlade. Bayfield, Burnett, Taylor and Oconto recorded the lowest percentages in 1962 in this group of counties.

Table XIV

Northern Counties

* A correction was made in Ashland and Bayfield counties in number of high school graduates for 1959, 1960 and 1961 due to an erroneously located high school. Therefore, these figures and percentages will differ from earlier studies.

As for the institutional preferences of the high school graduates from the northern area (Table 8, Appendix), those from Ashland favored the private college of Northland, Ashland County Teachers College, Superior, and the University of Wisconsin-Madison. Superior State College was attended by over 90 per cent of the high school graduates from Douglas County, a higher percentage of students attending one institution from a home county than any

other college in the state. More students from Bayfield, Burnett, Iron, and Sawyer counties also enrolled in Superior than any other college.

About the same numbers from Washburn County attended Superior, River Falls, and Eau Claire state colleges. Rusk County sent an equal number to Superior and Eau Claire; Price County to Stevens Point and Superior.

Lincoln, Langlade, and Taylor County Teachers Colleges enrolled larger numbers of students from their home counties than any other college in the state, as did Marinette Extension in Marinette County.

Vilas and Forest counties sent the largest number of their students to Stevens Point. With the exception of Douglas County, which sent most of its students to Superior, a variety of colleges were chosen by the graduates from the northern area, but the state colleges and the University of Wisconsin-Madison were used mainly by the area as a whole.

* * * * * * *

The following pages comprise an Appendix which show the Wisconsin colleges attended by high school graduates as new freshmen from each county in the state for the years 1956, 1959, 1960, 1961, and 1962.
